

Pesaro, Adriatic Arena

Pesaro, Italy

**Project Summary:**

Adjustment and efficiency of lighting of the sports facility.

The results represent a great change of direction for the property, which is fully satisfied with the result obtained:

- 60% energy savings
- Elimination of flicker for HD shooting
- Drastically reduced energy bill costs

Finally, the Adriatic Arena in Pesaro offers an improved visual experience for players and spectators who now enjoy an outstanding light!

**Data:**

The arena has therefore moved from a system of 50 2000W discharge projectors to an innovative LED system consisting of 54 831W fixtures with a lighting result of 900 to 2400 lux medium.
